Summary

A dedicated Software Engineer with a passion for problem-solving, attention to detail and the ability to multitask. Seeking a challenging role that utilizes my expertise in coding and enables me to learn new skills while making valuable contributions to the organization.

Core Competencies

- | | | | |
|-----------------|------------|---------------|--------------|
| • JavaScript | • React.js | • TailwindCSS | • HTML |
| • Redux Toolkit | • Node.js | • Express.js | • PostgreSQL |
| • REST APIs | • GIT | • Bootstrap | • CSS |

Experience

Bigscale Technologies Pvt. Ltd., Surat, India

Software Engineer

Jul 2025 – Present

- Collaborating closely with UI/UX designers and backend developers to create seamless user experiences.
- Implementing reusable components, state management (using Hooks, Context API, Redux, and Redux Toolkit), and routing with React Router.
- Integrating RESTful APIs and ensuring dynamic, real-time data rendering across the application.
- Optimizing front-end performance and handling cross-browser compatibility issues.
- Debugging and resolving bugs to maintain a smooth and stable codebase.
- Integrated and configured third-party libraries such as Moment.js for date handling and Jodit Editor for rich text editing.
- Contributing to the development of internal tools and automation scripts to improve developer productivity.

TST Technology, Surat, India

Software Engineer Trainee / Developer

Jan 2025 – Jul 2025

- Developed responsive and interactive user interfaces using ReactJS, JavaScript, HTML5, and CSS3.
- Collaborated with teams to integrate RESTful APIs and dynamic data into front-end components.
- Implemented reusable components and state management using React Hooks and Context API.
- Worked on integrating AI services/APIs to enhance application functionality and automate workflows.
- Gained hands-on experience with modern front-end tools, libraries, and development best practices.

Tech Elecon Private Limited, Anand, India

Software Engineer Intern

June 2024 – Dec 2024

- Developed responsive and interactive user interfaces using ReactJS, JavaScript, HTML5, and CSS3.
- Collaborated with teams to integrate RESTful APIs and dynamic data into front-end components.
- Implemented reusable components and state management using React Hooks and Context API.
- Gained hands-on experience with front-end tools and libraries.

Education

Charutar Vidya Mandal University, Anand, India

Jun 2025

B.E. in Computer Engineering

- CGPA (8.20/10)

Higher Secondary School, Gujarat Board, India

March 2021

Stream - Science

- Grade, 82.46%

Achievements, Leadership & Extra Curricular Activities

- ISTE Core Team Member.
- Code Unnati SAP Certification.
- Participate in Google Cloud Study Jam.
- College Annual Tech Fest Coordinator.
- Class Representative.
- Believe in Peer Mentoring.

Major Projects

BakeFlow - Smart Order & Inquiry Manager for Bakers

- Web application designed for home bakers to manage product listings, customer inquiries, and order workflows in a simple and intuitive way.
- Built an admin panel with full CRUD functionality to add, edit, and delete products dynamically.
- Enabled bakers to share a unique store link with customers, allowing them to browse products and place orders directly.
- Built order handling functionality where bakers can accept or reject incoming orders seamlessly.
- Enhanced user experience with search, filtering, and fully responsive design.
- Prioritized intuitive UI/UX for non-technical users, improving accessibility and ease of use.

Email Marketing Tool

- Web application that allows users to create, schedule, and manage bulk email campaigns for targeted marketing purposes.
- Integrated scheduling functionality to automate email dispatch on selected dates and times.
- Users can design custom email templates using a rich text editor.
- Real-time analytics dashboard to track open rates, click rates, reply rates, and user engagement.
- Implemented Jodit Editor for rich-text email creation and Ant Design components for a consistent UI.

Exclusive Vaults

- Web Application that stores a specific set of information regarding vehicles in the form of data vaults which is stored publicly.
- Others viewers can see the specifications and images of the vehicles and can like and comment and even make an offer directly through the web application.
- Integrated real-time chat with admin and weekly vehicle update notifications.
- The user also gets notified of newly available vehicles weekly through email.
- I have Integrated Algolia and HubSpot search to enhance search accuracy and user experience.

Structa

- Led the frontend development of a real estate analytics platform with a focus on performance and intuitive user experience.
- Built advanced search and filtering UI, improving user engagement and query efficiency.
- Integrated interactive maps and geospatial overlays using Google Maps API to visualize demographic and location data.
- Developed dynamic data visualizations (e.g., population, income, family stats) using Chart.js and third-party APIs.
- Displayed real-time insights from automated web scraping pipelines, enriching the frontend with timely, accurate data.
