

RUTU KOLADIYA

Frontend Developer | React.js | Next.js

Surat, Gujarat | +91 8780266972 | ruturkoladiya@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of professional experience building production-grade React.js and Next.js applications across healthcare and business platforms. Experienced in developing complex business modules, reusable component architectures, state management, REST API integrations, SQL queries, and performance optimization. Alongside frontend development, contributing to backend development with Node.js, Express.js, and PostgreSQL through API development, database operations, and internal automation. Focused on writing clean, maintainable code and building scalable applications that solve real business problems.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, Redux Toolkit, RTK Query, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Ant Design, Shadcn UI, Vite

Backend & Databases: Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, Cloudinary, Figma

Core Competencies: Performance Optimization, Responsive Design, Component Architecture, API Integration, State Management

AI Tools: OpenAI API, Google Gemini API, AI-assisted development workflows

EXPERIENCE

Frontend Developer

Jul 2025 – Present

Bigscal Technologies Pvt. Ltd., Surat, India

- Developing and enhancing Healthray Lab, a production-grade Laboratory Management System used by healthcare organizations, building and maintaining core product modules including patient registration, pathology, radiology, billing, and reporting using React.js in a product-based development environment.
- Designed reusable component architecture and centralized state management using React Hooks, Context API, Redux Toolkit, and RTK Query, reducing code duplication and improving development efficiency across multiple modules.
- Integrated 25+ REST APIs across patient registration, billing, pathology, and reporting workflows with centralized error handling, loading states, and response validation to ensure a reliable user experience.
- Improved application performance by reducing unnecessary re-renders, optimizing component rendering, and implementing lazy loading for large modules to enhance responsiveness across data-intensive workflows.
- Integrated third-party libraries like Day.js, CK Editor, and pdfMake, to add date handling, rich-text editing, and PDF report generation.
- Developed and maintained Express.js APIs, wrote SQL queries for PostgreSQL, and built internal automation scripts to support production workflows and improve development efficiency.

Frontend Trainee / Developer

Jan 2025 – Jul 2025

TST Technology, Surat, India

- Developed responsive web applications using React.js, Next.js, JavaScript, and Tailwind CSS for multiple client projects.
- Integrated OpenAI APIs to automate repetitive workflows and deliver AI-powered application features.
- Worked closely with UI/UX designers, backend developers, and QA engineers to translate designs into responsive interfaces, integrate APIs, and maintain high-quality application releases.
- Built reusable UI components and shared utilities to improve maintainability and consistency across projects.
- Participated in feature planning, bug fixing, code reviews, and daily Agile development activities.

Frontend Intern

Jun 2024 – Dec 2024

Tech Elecon Private Limited, Anand, India

- Led a small team of frontend interns by coordinating tasks, reviewing implementations, and ensuring timely feature delivery.
- Developed responsive UI components using React.js, JavaScript, and TypeScript while following reusable component design principles.
- Worked closely with backend developers to integrate REST APIs and deliver dynamic user interfaces.
- Resolved UI bugs, improved application consistency, and gained hands-on experience with Git-based collaborative development.

PROJECTS

BakeFlow: Smart Order & Inquiry Manager for Bakers

React.js, Redux Toolkit, REST APIs, Tailwind CSS, PostgreSQL, Express.js, Node.js

- Built a centralized order and inquiry management platform that helped home bakers manage products, customer inquiries, and order workflows from a single dashboard.
- Developed a complete product management system with CRUD operations, enabling dynamic catalog management without requiring developer intervention.
- Designed a shareable storefront that allowed customers to browse products and place inquiries without creating an account, improving accessibility for small businesses.
- Implemented order approval workflows, advanced search, filtering, and responsive layouts to streamline day-to-day operations across desktop and mobile devices.

Structa: Real Estate Analytics Platform

React.js, Google Maps API, Chart.js, REST APIs

- Developed a real estate analytics platform that visualized property insights through interactive maps, demographic data, and dynamic dashboards.
- Integrated Google Maps API and Chart.js to deliver location-based analytics and data-driven visualizations.
- Built advanced search and filtering capabilities, improving property discovery and user navigation.
- Collaborated with the team to build a responsive, performance-focused interface that simplified complex real estate data into actionable insights.

Email Marketing Tool

React.js, Ant Design, Jodit Editor, REST APIs

- Developed an email campaign management platform for creating, scheduling, and monitoring bulk email campaigns.
- Integrated Jodit Editor to provide a rich-text email template builder with an intuitive editing experience.
- Implemented email scheduling and REST API integrations to automate campaign management and delivery.
- Built a real-time analytics dashboard displaying campaign performance metrics including open, click, and reply rates.

Exclusive Vaults

React.js, Algolia, HubSpot, REST APIs

- Developed a vehicle marketplace platform that enabled users to explore detailed vehicle information, engage with listings, and communicate directly with administrators.
- Implemented real-time chat and automated weekly email notifications to keep users informed about newly listed vehicles.
- Collaborated on responsive UI development while integrating third-party services to improve search, communication, and customer engagement.
- Integrated Algolia-powered search to deliver fast and accurate vehicle discovery across large datasets.

EDUCATION

B.E. in Computer Engineering - Charutar Vidya Mandal University, Anand, India

Jun 2025

CGPA: 8.20 / 10

Higher Secondary (Science), Gujarat Board, India - 82.46%

ACHIEVEMENTS & LEADERSHIP

- ISTE Core Team Member
- Code Unnati SAP Certification
- Participant in Google Cloud Study Jam
- College Annual Tech Fest Coordinator
